St. Mary's Convent School

10th April 2017 - March 2018

PROJECT

PGLife [7]

July 2023 - September 2023

- A Paying Guest Finder website built with HTML, CSS, PHP, JavaScript, SQL, Bootstrap, and React Js offers users a responsive, dynamic platform to search for PG accommodations.
- · It features real-time filters, secure authentication, payment, and messaging, with mobile-friendly design and seamless interactions for property listings and user management.

Prescripto Website [7]

July 2024 - August 2024

- Designed a responsive interface with React for booking doctor appointments.
- Built features like doctor search, appointment scheduling, and booking summaries.
- Enhanced usability and engagement with clean UI/UX design principles.

Ecommerce with ReactJS [7]

September 2024 - November 2024

- Designed a responsive, visually appealing interface with React Js for seamless food ordering.
- · Implemented dynamic menu filtering, cart management, and order summaries.
- Enhanced navigation and usability using UI/UX principles for better engagement

SKILLS

• Front-end: HTML, CSS, React Js

• Back-end: Java, JavaScript, PHP, Python

Tools: VS Code, GitHub, Bootstrap, Tailwind CSS

Databases: MySQL, SQL
