SUMMARY

Computer Science graduate with hands-on experience in **Java, Spring Boot, SQL, REST APIs, React, and database-driven applications**. Skilled in backend development, problem solving, Agile methodologies, and AI-assisted development. Interested in building scalable software and business solutions.

WORK EXPERIENCE

Solveforge Private Limited

Web Developer Intern

July 2023 - August 2023

- Developed and maintained web modules using PHP, JavaScript, HTML, CSS, and MySQL
- Built REST APIs enabling smooth data flow between UI and backend components
- Collaborated with UI/UX team to enhance mobile responsiveness
- Used Git & GitHub for version control and deployment

EDUCATION

IMS Engineering College

Bachelor of Technology (Computer Science)

November 2020 - June 2024

Marigold Public School

12th

April 2019 - March 2020

St. Mary's Convent School

10th

April 2017 - March 2018

PROJECTS

Student Attendance Management System [🔗](#)

- Built a full-stack attendance system using **Spring Boot, React, and MySQL** with Admin, Teacher, and Student dashboards.
- Implemented **JWT authentication and role-based authorization** using Spring Security.
- Developed attendance sessions, bulk marking, history, subject-wise statistics, and performance insights

HireFlow AI [🔗](#)

- Developed an AI-powered recruitment platform using **Java 21, Spring Boot, React, PostgreSQL, and REST APIs**.
- Implemented authentication, job management, resume upload/download, and protected APIs using **JWT and Spring Security**.
- Integrated **Google Gemini API** for resume analysis and AI-powered job-resume matching.

Student Information Management System

- Developed **Spring Boot REST APIs** for student record management with CRUD operations.
- Implemented validation, exception handling, and database persistence using **Hibernate/JDBC**.
- Applied layered architecture for clean and maintainable backend development.

SKILLS

- **Programming & Database:** Java, SQL, MySQL
- **Backend Development:** Spring Boot, REST APIs, JDBC, Hibernate, JPA
- **Business & Analytical Skills:** Problem Solving, Logical Reasoning, Requirement Analysis, Data Analysis
- **Tools:** Git, GitHub, JIRA (Basic), IntelliJ IDEA
- **AI & Productivity Tools:** Prompt Engineering, AI Agents, RAG Systems, MCP, Cursor AI
- **Concepts:** SDLC, Agile Methodology, API Development

CERTIFICATE

IBM Java Full Stack Developer [🔗](#)

- Trained in Core Java, Spring Boot, REST APIs, Hibernate, JDBC, JPA, Spring Security, Redis, Kafka, and Microservices
- Worked with JUnit, Mockito, OAuth2, GitHub Integration, and distributed application concepts

AI Toolkit & Agentic Development Training [🔗](#)

- Learned Prompt Engineering, AI-assisted Development, RAG Systems, AI Agents, and MCP fundamentals
- Built Text-to-SQL workflows using PostgreSQL, Docker, MERN Stack, GitHub Actions, and deployment platforms
