SUMMARY

Computer Science graduate with strong analytical and problem-solving skills and hands-on experience in Java, SQL, REST APIs, and database-driven applications. Familiar with Agile methodologies, JIRA, and AI-assisted development tools. Interested in financial products, wealth management technology, and business analysis. Eager to contribute to real-world business solutions while building expertise in financial services and product support.

WORK EXPERIENCE

Solveforge Private Limited

Web Developer Intern

July 2023 - August 2023

- Developed and maintained web modules using PHP, JavaScript, HTML, CSS, and MySQL
- Built REST APIs enabling smooth data flow between UI and backend components
- Collaborated with UI/UX team to enhance mobile responsiveness
- Used Git & GitHub for version control and deployment

EDUCATION

IMS Engineering College

Bachelor of Technology (Computer Science)

November 2020 - June 2024

Marigold Public School

12th

April 2019 - March 2020

St. Mary's Convent School

10th

April 2017 - March 2018

PROJECTS

Student Information Management System

- Developed RESTful services using Spring Boot for managing student records
- Implemented secure CRUD operations with proper validation and exception handling
- Integrated Hibernate/JDBC for database persistence
- Applied layered architecture and wrote clean, maintainable code

Prescripto Website [🔗](#)

- Developed backend APIs for doctor appointment booking
- Integrated REST APIs for real-time frontend-backend communication

E-Commerce Food Ordering System

- Implemented cart, ordering, and menu management workflows
- Developed API-driven backend services and database operations

SKILLS

- **Programming & Database:** Java, SQL, MySQL
- **Backend Development:** Spring Boot, REST APIs, JDBC, Hibernate, JPA
- **Business & Analytical Skills:** Problem Solving, Logical Reasoning, Requirement Analysis, Data Analysis
- **Tools:** Git, GitHub, JIRA (Basic), IntelliJ IDEA
- **AI & Productivity Tools:** Prompt Engineering, AI Agents, RAG Systems, MCP, Cursor AI
- **Concepts:** SDLC, Agile Methodology, API Development

CERTIFICATE

IBM Java Full Stack Developer [🔗](#)

- Trained in Core Java, Spring Boot, REST APIs, Hibernate, JDBC, JPA, Spring Security, Redis, Kafka, and Microservices
- Worked with JUnit, Mockito, OAuth2, GitHub Integration, and distributed application concepts

AI Toolkit & Agentic Development Training [🔗](#)

- Learned Prompt Engineering, AI-assisted Development, RAG Systems, AI Agents, and MCP fundamentals
- Built Text-to-SQL workflows using PostgreSQL, Docker, MERN Stack, GitHub Actions, and deployment platforms
